

Electronic Artwork Transfer Guidelines

For best results in transferring artwork, please adhere to the following notices:

Artwork

We use vector art for production, therefore please use the following preferred formats:

- .cdr – CorelDraw12 (or older version) preferred
- .ai – Adobe Illustrator CS2 (or older version)
- .dxf – AutoCad (2008 or older version)
- .pdf – Acrobat (version 7 or older)
- .eps – Adobe Illustrator CS2

Raster (bitmap) artwork is good for photographic images; they must be 300dpi at full size:

- .tif
- .bmp
- .wmf
- .pcd
- .jpg

Hardware

CD ROM

DVD ROM

*Please convert Macintosh files to be readable in PC formats

*Due to the constantly changing technology and quality of original art, Gregory Signs cannot guarantee output from any or all of these file types. We do believe this is the most efficient method of graphic transfer available. If only hard copy high resolution camera ready art is available, this is completely acceptable.
